1 General description

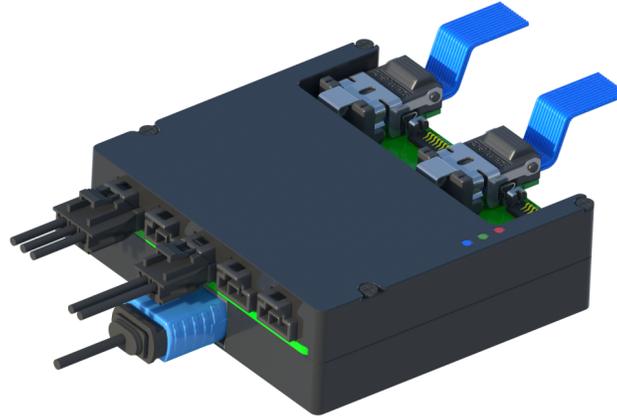

Figure 1: Isometric view of ADPT-4P-X2G3-FF-X8G3-MTP

- Adapter to connect XIMEA FireFly cameras to MTP cable
- Connects 4x PCIe Gen3 x2 cameras
- Copper FireFly cable from camera turns to fiber optic MTP cable
- Offers Power and IO connectors for synchronization and triggering
- Suitable for cameras from: *xiX family*

This adapter offers a streamlined way to connect your PCIe/FireFly camera directly to your PC, eliminating the need for an xSwitch. A FireFly ECUE copper cable is needed for connecting a camera(s) to the adapter. The adapter features an integrated Samtec PCUO module. This allows for a high-speed connection to your PC using an optical MTP cable. The adapter comes bundled with a power cable (CBL-XEC2-PWR-0M15) to ensure smooth operation and provides connectors for GPI/GPO signals from the camera, enabling control and synchronization with other devices (cables required for GPI/GPO functionality).
